DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/931135, filed on 8/16/2001.

Claim Objections

2. Claim 1 is objected to because of the following informalities: reference number 5, the "actuation part" as defined in the specification is referred to as the "activation part" in Claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d). The phrase "such as" renders the claim indefinite because it is unclear

Art Unit: 3721

whether the limitations following the phrase are part of the claimed invention. See

MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Becht et al. ('000).

Becht et al. discloses a shaft 50, a clamping lever 23, a mechanical braking device 34, 51, 52, 53, 36 and 37 and (col. 1 lines 46-53), a switching member 20, safety element 21, actuation part 17, a hook element 15', engaging in recess 21', and a bolt 47.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nymann, Todero, Kelley, Kirn, and Wieland et al. are cited to show the state of the art.
